

FINE CONTOUR

LIFTING AND FIRMING • SMOOTHS FINE LINES • REJEUVENATION

The exosome based serum that replaces and exceeds Botox

FINE CONTOUR is a powerful lifting and volumising serum with a mechanism similar to Botox to alleviate the deep wrinkles of the skin.

Containing IT-EXO[®] exosomes to promote collagen synthesis, which in turn promotes tissue remodeling for lifting and volume. PDRN ... Sodium Hyaluronate provides moisture to the skin and protects it from stress caused by external stimuli. A blend of peptides and amino acids also enhance lifting, elasticity and anti-aging.

KEY ACTIVE INGREDIENT: IT-EXO[®]

Exosomes from the youngest, most potent, and safest human-compatible source. Reinforced with patented Immune Tolerance technology, which prevents immune rejection to exosomes therapy, so that treatment effects do not plateau over time.

HOW TO USE

Like all other RETRO EV bioscience formulas, FINE CONTOUR is designed to be combined with non-invasive clinical procedures such as microneedling or electroportation therapy. It can also be used as a topical serum post-laser.

1	Withdraw 2.5ml of FINE CONTOUR using a syringe or attach the dropper cap included in the box
2	Apply the FINE CONTOUR solution to one treatment zone at a time before going over with your treatment tool of choice, ensuring to massage manually with fingertips for absorption
3	Allow to dry before applying your chosen post-treatment cream

To maximise results, we recommend patients complement their in-clinic treatments with at-home routines.

KEY INGREDIENTS

Exosomes

Exosomes have been proven to boost collagen production, promote angiogenesis, encourage cellular growth, and support wound healing.

An Exosome is a tiny nano vesicle found within cells, carrying essential biomolecules for cellular regeneration such as proteins, lipids, and nucleic acids. They are key to tissue repair, regeneration, and healing: accelerating wound closure, minimizing scar formation, distributing collagen fibers more effectively, and aiding the regeneration of hair follicles, sebaceous glands, nerves, and blood vessels.

NOT ALL EXOSOMES ARE MADE EQUAL. THE RETRO EV DIFFERENCE IS IT-EXO[®]

Despite their nano size, Exosomes that do not come from our own body are proven to trigger immune response—causing the Exosomes to be rejected and declining efficacy of repeated treatments.

IT-EXO[®] is the **only** Exosome ingredient proven to overcome this limitation and be fully accepted by cells in our body.

Other unique hallmarks of how we produce IT-EXO[®] vs other Exosomes ingredients:

- 0% animal by-products ensures the purity of IT-EXO[®]
- 0% use of centrifugation preserves the potency and structure of IT-EXO[®]

Sodium Hyaluronate: Helps provide intense hydration and improving skin elasticity.

Sodium DNA: Supports cell regeneration by improving skin texture, elasticity, and hydration.

Acetyl Hexapeptide-8: Known for its ability to reduce the appearance of wrinkles and fine lines by relaxing facial muscles, it helps inhibit muscle contractions that cause expression lines.

6 anti-inflammatory botanical ingredients: Including arnica extract, wormwood extract, and yarrow extract
