

FNC 30

FAT DISSOLVING • SCULPTING • TIGHTENED AND FIRMER SKIN

A potent targeted fat dissolving serum

FNC30 is a bio-active serum that induces a lipolysis effect while enhancing the appearance of skin.

Containing **Sodium Deoxycholate** and **Carnitine** which are proven to stimulate lymphatic circulation and drainage, sculpt the face, as well as tighten and firm the skin for an enhanced appearance.

Plant extracts such as **Ginkgo Biloba Leaf Extract**, **Hamamelis Virginiana (Witch Hazel) Extract** work synergistically to improve blood circulation and promotes the breakdown of fat cells, while **Caffeine** stimulates blood flow, reduce water retention and puffiness and promotes lipolysis, the breakdown of fat cells.

HOW TO USE

Like all other RETRO EV bioscience formulas, FNC30 is designed to be combined with non-invasive clinical procedures such as microneedling or electroportation therapy. It can also be used as a topical serum post-laser.

1	Withdraw 2.5ml of FNC30 using a syringe or attach the dropper cap included in the box
2	Apply the FNC30 solution to one treatment zone at a time before going over with your treatment tool of choice, ensuring to massage manually with fingertips for absorption
3	Allow to dry before applying your chosen post-treatment cream

To maximise results, we recommend patients complement their in-clinic treatments with at-home routines.
